Science Lab Renewal

50% of our students utilize the Science Lab at MVA each school year.

50 years have gone by since the lab was built. It has set the stage for many students to pursue careers related to science, including medicine, dentistry, nursing, teaching, and engineering.

Now it needs a renewal. Some parts are worn out or broken. And science, technology and safety standards have changed in fifty years.

Matching Funds Challenge

Thanks to a generous **50-50** challenge from the Archie Tonge Educational Fund, **every dollar we raise between now and May 15, 2019 will be matched, up to a maximum of \$70,000.**

Your generous gift will enable MVA to continue equipping young minds with the knowledge of God's great universe that is needed for careers in service to Him and to others.

The renewal will include

- New lab tables, sinks, faucets and gas supplies
- New equipment
- New cabinetry storage
- Safer chemical storage
- Adding a full safety shower in case of contact with dangerous chemicals
- A new counter and deep sink will be added near the shower
- LED lighting, which will be brighter and more cost-efficient
- A new exhaust fan
- New flooring to cover the existing asbestos tiles
- Replacement of asbestos tiles in the ceiling

Rise to the Challenge Ways to Give

Consider how MVA has enhanced your life, your children's lives, and students you have known. **Please make a heartfelt gift this month.**

Checks may be mailed to MVA. At the MVA website [<http://www.mtnviewacademy.org/give/>]. There are details of creative ways to give including online credit card contributions (simply call the school office if you prefer to talk to a real person!), gifts of stock, and corporate matching gifts. Sara Baroro [businessmanager@mtviewacademy.org] is happy to help you to facilitate your donation or to provide further information.

Your gift will be received with great joy.

Thank you!

Thank you for supporting the future success of MVA's students through your generous gift to the Science Lab Renewal project. If you have additional questions about the project scope contact Jim Marxmiller [jmarxmiller@mac.com].
